#### After The Board Decision

In a decision rendered on 03/18/2005, the Board had reversed the Examiner on all counts or claims. Thus, prosecution is herein being re-opened and a Non-Final Office Action follows.

#### **DETAILED ACTION**

# Specification

#### Status of the claims

Claims 1-30 are currently pending in the Instant Application.

# Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

As per claims 2, 5, 15 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 2, in the limitation "wherein accruing a credit includes allowing access to content" it is unclear whether the Applicant meant to refer to --providing free access to content to a customer in return for playing/viewing an advertisement- - or - -allowing the customer or user

to redeem a portion of the accrued or accumulated credits for a free access to content--. The claim will be broadly interpreted.

As per claims 5, 15 and 25, it is unclear how the watermark can help determine the speed at which the advertisement was played. In other words, important elements necessary for the understanding of the claim language are omitted therefrom. Thus, The claim will be broadly interpreted.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Rodriguez, US Patent 6,650, 761 B1

As per claims 1-30, Rodriguez discloses, inter alia, a system for watermarking content, such as a downloaded video or a transmitted advertisement, to thereby guarantee integrity of the downloaded content or transmitted advertisement upon receipt and to correctly bill the recipient

Application/Control Number: 09/690,512

Art Unit: 3622

of the video content for what was actually received as opposed to what was transmitted or downloaded.

Furthermore, watermark technology is used to track and verify proper delivery of content including advertising content. In one application of this technology, recipients of advertising content, such as TV subscribers, computer users (identified users), are provided incentives for viewing advertising in its entirety. For example, a content-receiving device, such as a computer, can include a watermark detector that issues a receipt for each watermarked advertisement that is heard/viewed in its entirety (providing accrued incentives or accumulated rewards to an identified user of a computer or a set-top-box for listening to played or viewing displayed watermarked advertisements). These receipts may be redeemed, for example, for content tokens (type of currency), for monetary value, etc. In some embodiments, receipts are generic and can all be applied to a desired premium, regardless of the advertisements through which they were earned. In other embodiments, the receipts are associated with the particular advertisers (or class of advertisers). Thus, an identified or a specific TV viewer who accumulates 50 receipts (accrued rewards) for hearing/viewing advertising originating from Procter & Gamble may be able to redeem them for a coupon good for \$2.50 off any Procter & Gamble product, or accrued or accumulated receipts from Delta Airlines may be redeemed for Delta frequency slier miles (e.g., at a rate of one mile per minute of advertising heard/viewed). Such incentives are particularly useful in new forms of media that give the consumer enhanced opportunities to fast-forward or otherwise skip advertising (col. 57: 65 to col. 58: 34).

Application/Control Number: 09/690,512

Art Unit: 3622

(Col. 44: 17 to col. 45: 22; col. 24: 23-37; col. 54: 26-54; col. 55: 35 to col. 56: 19; col.

57: 9 to col. 58: 34).

# Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 6, 216, 112B1 to Fuller discloses a method and system for distributing free software, having advertisements embedded therein, to customers and compensating the authors of the software for every copy of the software illegally distributed by collecting payments from advertisers or sponsors whose advertising messages are inserted in the said software to be displayed on the customer's or user's PC screen. The software or application software, downloaded over the Internet from a web site related to a computer server 102 of fig. 1 or shipped to a user on a floppy disk or a CD ROM (Media player) to be installed on the user's PC 110 of fig. 1, is executed by the user on his PC 110 of fig. 1 subsequent to installing the software on his computer hard disk (See abstract; col. 2: 30-32). Here, the user has restricted rights to the free software and thus, he must occasionally or periodically read advertising messages whenever he executes the said software or before using the software.

Any inquiry concerning this communication from the Examiner should be directed to Jean D. Janvier, whose telephone number is (571) 272-6719. The aforementioned can normally be reached Monday-Thursday from 10:00AM to 6:00 PM EST. If attempts to reach the Examiner
